

Comments on LPFM Priority.

1. We benefit from K-LOVE radio and its translator stations greatly. Being able to listen to music with only a little talk and have absolute confidence that it will not offend me or hurt my children is a tremendous thing and worth protecting. The translators reach into rural Colorado without a formal station. That lets us get our regular radio station even when we are traveling. We often go to Grandma's and it is important to have good radio to listen to on the way and there. K-LOVE and the translator stations make this possible.
2. If translator stations are "bumped" by LPFM stations, that cuts us off when traveling. It also seems very improper to put one station out, even though it has been there and on the air, for another one. There needs to be a "grand-fathering" of stations and not priority to LPFM. It goes without saying that the LPFM station would MOST LIKELY not be of the caliber of K-LOVE.
3. Having a station of high integrity and an encouraging format is a necessity in this day of garbage radio. We need a "safe place" on the radio dial for our families to listen to. This service, provided by K-LOVE and a small handful of others via translator stations is profoundly in the public interest.

Please do not let LPFM have priority over existing translator stations.

Thank you.
